SALES REP DIRECTORY

another time-saver for engineer & P.A.

2,500 manufacturers' sales representatives are listed geographically and alphabetically in the *eem* "Sales Representative Directory." Helps you locate any representative in your area quickly.

alphabetical section

Geist, W. K., Co., 1205 Air Way, Glendale, Cal., (213) 245-9501. Branch Offices: Cupertino, San Jose, Cal.

Gene F. Sales Co., 4750 N. Milwaukee Ave., Chicago, Ill., (312) 545-5562, TWX: 312-265-1496

Gentry Assocs., Inc., 2517 B E. Colonial Dr., Orlando, Fla., (305) 424-0730, 4949, TWX: 810-850-0136. Branch Offices: Huntsville, Ala.; Eau Gallie, St. Petersburg, Fla.; Atlanta, Ga.; Jamestown, N.C.

Gerber Sales Co., Inc., 176 Second Ave., Waltham, Mass., (617) 891-8040, TWX: 710-324-1937. Branch Offices: New Haven, Conn.; E. Longmeadow, Mass.

Gianaras Sales, 7051 W. Wilson Ave., Chicago, Ill., (312) 774-4600, TWX: 910-221-5223

geographical section

GEIST, W. K. CO., 1205 Air Way, (213) 245-9501.
Branches: Box 746, Cupertino, Calif., (408) 253-5433; 7267 Bark La., San Jose, Calif., (415) 968-1608.
Factories: Data Instr.; Eppley Lab.; Farrand Controls; General Resistance; Holt Instr. Lab.; Inland Testing Lab.; NH Rsch; Pastoriza Elec.; Scientific Columbus; H.H. Scott; Waveforms. **Selling To:★ I,M.**
Services: Mobile Demonstration Bus. **Salesmen:** 5 (eng 5)
(See Advertisement Page 2974)

McCOY, J.L. CO., 940 Alma St., (213) 246-2134.
Factories: Leyman; Linden Labs.; Madison Labs.; Nat'l. Semiconductors; Nuclear Enterprises.
Selling To:★ I. **Services:** Direct Mail, Stock

Get your copy today!

World's most useful source of standard electronic products

RAPID REFERENCE TO OFF-THE-SHELF PRODUCTS AVAILABLE FROM DISTRIBUTORS

190,000 Items	**33 Products Sections**	**Descriptions Specifications Prices**	**13,000 Illustrations**	**260 Manufacturers**

12 WAYS

the new MASTER helps engineers and purchasing agents

1. Saves design time — the product you are looking for is illustrated and completely described.

2. Saves "shopping" time — all similar products are cataloged in a particular product section; it's simple to make a rapid decision.

3. Short-cuts delivery time — products shown in The MASTER are available from local distributors — just a phone call away.

4. Speeds inter-company communications — wide distribution of The MASTER at your company means other engineers, purchasing agents and buyers have a copy — thus you have a common frame of reference.

5. Saves buying time — descriptions, specifications so complete, you can purchase directly from information in The MASTER.

6. Cuts production cost — big illustrations, detailed specs, wide variety help you locate standard items that meet your requirements. Eliminates need to order a custom item.

7. Aids in selecting right product — comparison of specs, features, prices of several makes of similar-type products is simplified.

8. Keeps production lines moving — you can get that much needed product that's holding up production from your local distributor's stock.

9. Saves prototype and development time — helps you locate a standard product available for off-the-shelf delivery from a local distributor.

10. Locates many items not contained in smaller catalogs because it is the world's biggest electronic catalog of standard items.

11. Makes it easy for you to find the product you want immediately — 33 product sections and complete index make it also the easiest to use.

12. Saves time in writing specifications — information is so complete, so detailed.

Write — call — rush to your local electronic distributor.

1969 edition

World's most useful source of standard electronic products

1788 PAGES

RAPID REFERENCE TO OFF-THE-SHELF PRODUCTS AVAILABLE FROM DISTRIBUTORS

190,000 Items	**35 Product Sections**	**Descriptions Specifications Prices**	**13,000 Illustrations**	**260 Manufacturers**

12 WAYS

the new 1969 MASTER helps engineers and purchasing agents

1. Saves design time — the product you are looking for is illustrated and completely described.
2. Saves "shopping" time — all similar products are cataloged in a particular product section; it's simple to make a rapid decision.
3. Short-cuts delivery time — products shown in The MASTER are available from local distributors — just a phone call away.
4. Speeds inter-company communications — wide distribution of The MASTER at your company means other engineers, purchasing agents and buyers have a copy — thus you have a common frame of reference.
5. Saves buying time — descriptions, specifications so complete, you can purchase directly from information in The MASTER.
6. Cuts production cost — big illustrations, detailed specs, wide variety help you locate standard items that meet your requirements. Eliminates need to order a custom item.
7. Aids in selecting right product — comparison of specs, features, prices of several makes of similar-type products is simplified.
8. Keeps production lines moving — you can get that much needed product that's holding up production from your local distributor's stock.
9. Saves prototype and development time — helps you locate a standard product available for off-the-shelf delivery from a local distributor.
10. Locates many items not contained in smaller catalogs because it is the world's biggest electronic catalog of standard items.
11. Makes it easy for you to find the product you want immediately — 35 product sections and complete index make it also the easiest to use.
12. Saves time in writing specifications — information is so complete, so detailed.

Write — call — rush to your local electronic distributor.

CATALOG SECTION

2430

CATALOG PAGES

organized into

56

PRODUCT SECTIONS

- easy comparison
- complete specifications
- intelligent purchasing

eem — Electronic Engineers Master saves you engineering, specifying and purchasing time. Manufacturers' catalogs are grouped under easy-to-remember headings.

The 56 sensible Product Sections broadly categorize related electronic components, equipment, materials, instruments and systems, and fabrication services, enabling you to quickly compare and evaluate similar items.

To pinpoint or locate specific products within these catalog pages, always refer to the Product Index (Green Pages).

These are the 56 eem product sections:

PRODUCT SECTION	PRODUCT
1100	Amplifiers, Audio, Operational, etc.
1200	Antennas & Accessories
1300	Audio Equipment & Accessories
1400	Cabinets, Chassis, Containers, Racks, Boxes, etc.
1500	Capacitors (All Types)
1600	Chemicals (Acids, Adhesives, Coatings, Lubricants, Paints, Varnishes, etc.)
1700	Circuit Assemblies, Circuit Boards, Breadboards & Breadboarding Kits
1800	Coils (Inductors, Chokes), Assemblies, Forms
1900	Communications Equipment (Broadcast, Facsimile, Telephone, Television)
2000	Computing, Data Handling Equipment & Accessories
2100	Connectors, Electrical (Clips, Jacks, Plugs, Receptacles, Sockets, Terminals, Terminal Boards)
2200	Controls Control Components & Systems
2300	Crystals, Tuning Forks, & Accessories
2350	Delay Lines (All Types)
2400	Dials, Knobs, Handles, Panel Components
2450	Display Devices & Components
2500	Fabricated Mechanical Parts (Bearings, Cores, Gears, Magnets, etc.)
2550	Environmental Test Equipment
2600	Fans, Blowers & Cooling Equipment
2700	Filters
2800	Hardware, Non-Current Carrying (Bolts, Fasteners, Nuts, Screws, Washers, etc.)
2900	Instruments, Measuring & Test
3000	Instruments, Graphic Recording
3100	Insulators, Insulating Materials & Parts
3130	Integrated Circuits & Hybrid Microcircuits
3150	Manufacturing, Subcontracting, Custom Fabrication
3200	Materials, Raw (Metals, Plastics, Glass, Rubber, Cloth, etc.)
3300	Medical Electronic Equipment
3400	Microwave, Radar Equipment, Components & Accessories
3500	Motors, Rotating Components & Accessories
3600	Nuclear & Radiation Equipment
3700	Photoelectric Equipment & Components
3800	Optical Equipment & Accessories
3900	Pilot & Signal Lamps, Lights & Accessories
4000	Power Supplies, Converters, Inverters, Batteries, etc.
4100	Production Machinery & Automation Equipment
4200	Engineering Aids (Books, Drafting Equipment, Slide Rules, Microfilm Equipment, Whiteprinters)
4300	Recording Equipment (Non-Audio Types)
4500	Relays
4600	Research, Development, Engineering Services
4700	Resistors, Fixed
4750	Resistors, Variable (Potentiometers & Rheostats)
4800	Semiconductors, Semiconductor Devices, Rectifiers (Non-Tube Types)
4900	Servomechanisms & Components
5000	Studio Equipment
5100	Switches, Circuit Breakers, Fuses, Protective Devices
5200	Telemetering Equipment
5300	Thermal Devices, Thermistors, Thermocouples, Thermopiles, Thermostats, etc.
5400	Tools (Hand & Power); Soldering Supplies
5500	Transducers & Associated Equipment
5600	Transformers
5700	Tubes, Tube Parts, Shields, Inserts, etc.
5800	Ultrasonic, Sonic, Subsonic Equipment
5850	Vacuum Equipment & Accessories
5900	Vibrators, Choppers, etc.
6000	Wire, Cable, Harnesses, Accessories

ARVEE AMPLIFIERS for dependable service

Wideband and Video Amplifiers use type BNC connectors others on request.

Response flatness typically ±.5 DB.

Supply voltage usually single ended plus 15 volts.

Additional RFI shielding available for critical environments.

Output capability refers to 1 DB compression of gain.

FIGURE 1

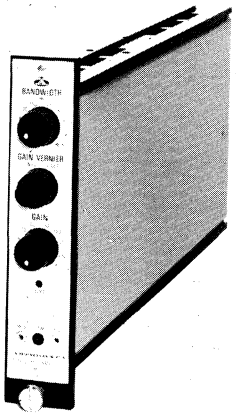
ASTRODATA

SERIES 889 AMPLIFIERS

A Family of Flexible Low Cost Chopperless Amplifiers



Model 505-900 Rack Module: Holds 12 amplifiers and Model 8200-146 Power Supply in standard 19-inch rack.

Dimensions (including power supply): 7 inches high x 21.5 inches deep.

Model 8200-146 Power Supply: Mounted on rear of companion Rack Module 505-900. Supplies power to 12 amplifiers.

Model 505-901 Rack Module: Holds 12 Model 889 Amplifiers fitted with individual amplifier power supplies, Model 8228-100.

Dimensions: 7 inches high x 21.5 inches deep.

Model 8228-100 Individual Amplifier Power Supply: Attaches to the rear of each amplifier. Supplies power for one amplifier.

Dimensions: 1.4 inches wide x 6.9b inches high. When the Model 8228-100 Power Supply is connected with the Model 889 Amplifier, the resultant composite assembly is a single unit nominally 1.4 inches x 6.96 inches x 20 inches. (W x H x D).

The Series 889 Amplifier is a chopperless, high-performance, differential instrument designed especially for use in systems requiring reproducible data of very high accuracy. The 889 Amplifier is capable of supplying either single or dual outputs. The single output model delivers a wideband signal of ±10 volts at ±100 ma. The dual output model provides ±100 ma output as well as ±10 volts at ±5 ma or ±100 ma selectable bandwidth output for multiplexers, VCO's, analog-to-digital converters and other comparable output devices.

HIGH PERFORMANCE

The 889 Amplifiers feature a wide frequency response, high common mode rejection, fast settling and overload recovery time. A low drift rate, low temperature coefficient and low input currents are obtained through application of the latest developments in integrated circuits.

GAIN FROM 1 TO 2500

The 889 Amplifier features a gain range of from 1 to 2500, which enables any desired output up to ±10 volts to be achieved.

3-POLE ACTIVE FILTER

Superior signal-to-noise ratio can be obtained with the 889 Amplifier through use of a 3-pole, active filter with 9 positions: 1 Hz, 3 Hz, 10 Hz, 30 Hz, 100 Hz, 300 Hz, 1000 Hz, 3000 Hz, and 10,000 Hz, as well as a wideband position.

120 DB COMMON MODE REJECTION

The 889 Amplifier provides at least 120 db of common mode rejection.

COMPLETE USEABLE BANDWIDTH

In the 889 Amplifier, no slew limiting will occur for differential full scale inputs of up to 40 kHz, which means that the entire selected bandwidth is usable up to 40 kHz.

32 DIFFERENT CONFIGURATIONS TO CHOOSE FROM

The ASTRODATA 889 Series of amplifiers features flexibility of design. There are 32 different configurations to choose from to fill specific needs. All of the configurations plug into the same rack adapter. Options such as gain vernier, gain readout, filtered output, etc. are covered in detail on the following pages.

SPACE SAVING PACKAGING

Twelve of the 889 Amplifiers occupy only seven inches of rack height and mount into the ASTRODATA standard Model 505-900 Rack Adapter or 505-901 Rack Adapter. A choice of individual or common power supplies is another of the outstanding features of the ASTRODATA 889 Amplifier.

HOW TO ORDER YOUR SERIES 889 AMPLIFIERS

Model	Description	Price	Dash No. Change For Gain Vernier Add $30.00	Dash No. Change For Gain Readout Add $20.00	Dash No. Change For Gain Vernier And Readout Add $50.00
889-100	Single output Gain Range 50-1000	$330	101	102	103
889-110	Single output Gain Range 1-1000	$385	111	112	113

Looking for OP AMPS and other ANALOG FUNCTION MODULES?

Then make sure you have up-to-date Burr-Brown application and product literature!

BB OPERATIONAL AMPLIFIER HANDBOOK AND CATALOG
52 pages of application information plus specifications on Burr-Brown's comprehensive line of discrete and hybrid thick-film IC op amps.

BB MULTIPLIER/DIVIDER CATALOG
18 pages of applications and product specifications covering Burr-Brown general-purpose multiplier/divider modules.

BB INSTRUMENTATION AMPLIFIER HANDBOOK AND CATALOG
36 pages of valuable application and product data on encapsulated Burr-Brown instrumentation amplifiers.

BB ACTIVE FILTER CATALOG
16 pages of specifications and applications on the industry's most comprehensive line of encapsulated active filters.

BB SAMPLE/HOLD CATALOG
16 pages of practical application notes and specs on Burr-Brown sample/hold modules.

BB COMPARATOR CATALOG
18 pages of performance and applications data covering Burr-Brown comparator modules.

BB COMPLETE LINE CATALOG
32 page catalog containing specifications on all Burr-Brown amplifiers, multipliers, sample/hold modules, comparators, sin/cos generators, squaring modules, function generators, power supplies, circuit simulators, IC manifold, accessories, and other function modules.

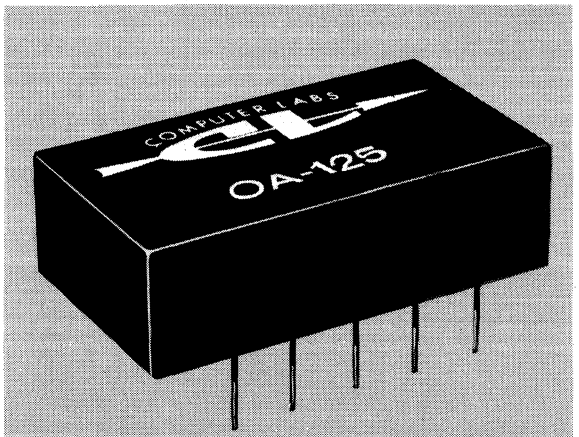
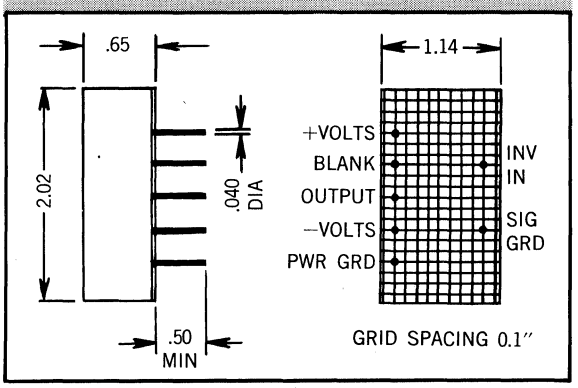
All or nothing

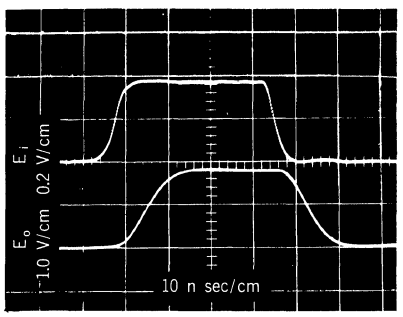
If our Op Amps don't have ALL these features, we don't ship

GAIN-BANDWIDTH PRODUCT: 125 MHz
OUTPUT VOLTAGE RANGE (±15-volt supply):
±2.0 volts into 100 ohms
±3.5 volts into 1000 ohms or greater
OUTPUT VOLTAGE RANGE (±12-volt supply):
±1.5 volts into 100 ohms
±2.0 volts into 1000 ohms or greater
VOLTAGE GAIN (DC open loop):
100,000 with 100-ohm load
SLEW RATE: 250 volts/u sec.
INPUT VOLTAGE OFFSET: 3 mv max.
(no adjustment required)
vs. temperature: 10 uv/°C
INPUT CURRENT OFFSET: 100 na max.
(no adjustment required)
vs. temperature: 20 na/°C
INPUT IMPEDANCE (DC): 50,000 ohms min.
INPUT NOISE: 40 uv rms
(for 1 MHz bandwidth)
INPUT-OUTPUT STRUCTURE: Single-ended
TEMPERATURE RANGE:
Operating: −25 C to +85 C
Storage: −60 C to +125 C
POWER: ±12 volts to ±15 volts (voltages used should be equal within 2%)

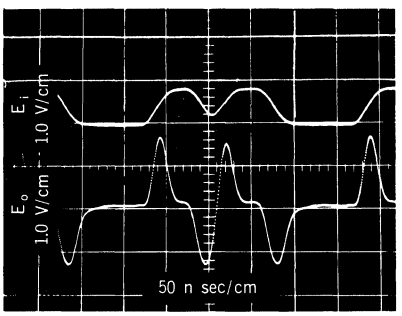


Operational Amplifier OA-125
Small lot price $135.00

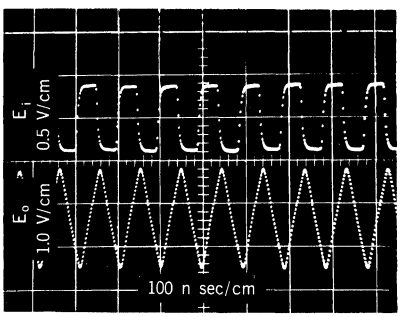




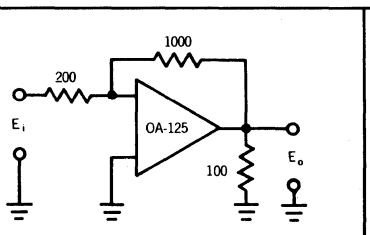
OA-125 IN CONSTANT GAIN APPLICATION

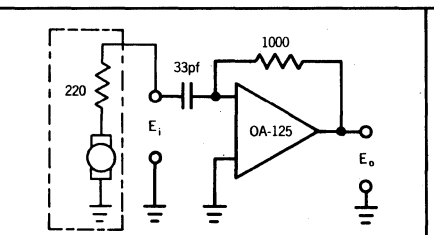


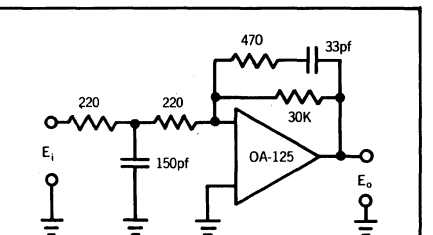
OA-125 AS A DIFFERENTIATOR



OA-125 AS AN INTEGRATOR







That isn't all...

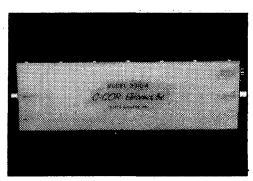
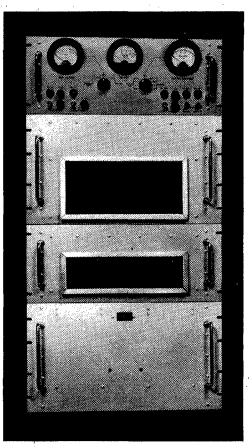
*DISTRIBUTED AMPLIFIERS

The distributed amplifier is an effective means of paralleling state-of-the-art solid-state and tube devices to obtain very high output powers. C-COR has been designing and manufacturing this type of device since 1953, and now offers a complete line ranging from 50 watt vacuum tube models to 5 watt solid-state units, most of which are listed in the tables.

New designs are coming out of our laboratory on a regular basis. Contact us for the most difficult requirements regarding power and bandpass. Some of our amplifiers are being used by NASA at Cape Kennedy in many critical applications.



The Model 3010-A is a solid-state distributed amplifier module which provides an output of ½ watt of linear power from 1 MHz to 425 MHz. The module design is such that efficient heat transfer can be accomplished in practically any mounting situation. The Model 3010-AP is available for pulse use.

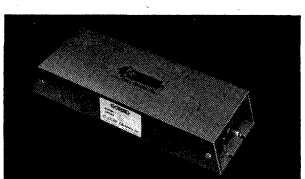


The illustration shows Model 1029 integrated into a complex amplifying system, designed and built for NASA, which delivers in excess of 20 watts of linear power. Available in several bandpass configurations, Model 1029 is capable of supplying up to 50 watts of power. It is adaptable for operation at lower powers on the order of 5 watts with intermod products of -40 dB. Many special requirements can be met, including RFI shielding.

NARROW-BAND POWER AMPLIFIERS

INTERSTAGE FILTER DESIGNS FOR SELECTIVE AMPLIFICATION—*SOLID STATE*

Model	Center Freq. Range	Bandwidth 3 dB Nom.	Power Output Max. dBm	Power Output @ 1 dB Comp. dBm	Gain Nom. dB	Z in	Z out	Dimensions & Wt. H in.	W in.	L in.	Wt. lb.	Desc.	Pkg.
3228	100-150 MHz	2%-10%	+31	+30	32	50	50	1¾	3½	9¾	1.5	available for class C ceramic tube	1, 4
3228-A	150-300 MHz	2%-10%	+30	+27	32	50	50	1¾	3½	9¾	1.5		1, 4
3228-B	300-500 MHz	2%-10%	+30	+27	25	50	50	1¾	3½	9¾	1.5		1, 4
3115	75-500 MHz	10-100 MHz	+43	+25 to +33	21	50	50	5	5	12	6		1, 4



Model 3228 is a high output, narrow band RF amplifier capable of operating at a customer selected fixed frequency between 100 MHz and 500 MHz. It operates as a linear amplifier for low levels and in a more efficient mode for high level signals.

The Model 3115 is a ceramic tube amplifier with multi-pole interstage filters with output capabilities up to 20 watts. The three stage amplifier module can be supplied in a wide range of center frequencies up to 500 MHz. Specify bandwidth required.

The 3007-L features a 1 kHz to 200 MHz solid-state distributed amplifier with 75 ohm output capability. Its low frequency response makes it very useful as a video amplifier, as well as an RF amplifier. The enclosure has efficient heat transfer and easy accessibility, which are featured in many of the modules listed. The Model 3329-E, which incorporates RC coupled transistor stages also uses this package.

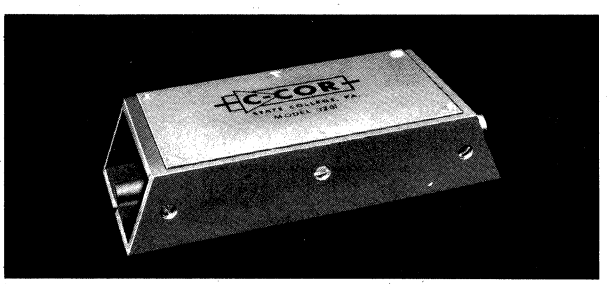
*The Model 2202 solid-state UHF preamplifier provides the ultimate in low-noise performance in an economical package suitable for outdoor mounting. This amplifier is ideally suited for any communication requirement where low-level signals must be amplified. The PS-25 dc power supply is a companion unit which is housed in an identical package.



**Model 3201-A is available in any center frequency from 100 MHz to 650 MHz with a noise figure of from 2 dB to 5 dB, depending on frequency and other specs. The module is housed in a rugged aluminum extrusion which features accessibility for repair and tuning. Similar to 2202 except Pkg. Other circuit designs available in Min-Econ packaging.

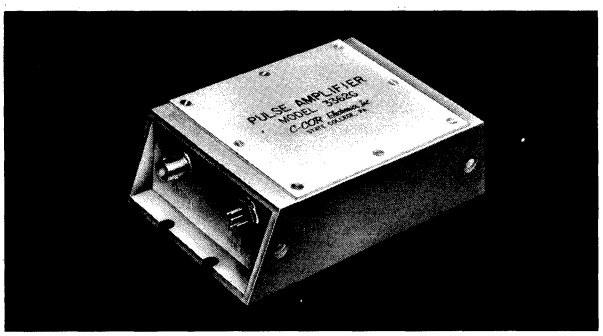
The Model 3329-G is one of a family of broad-band RC coupled amplifiers with extremely low frequency response which enables it to handle extremely wide as well as very fast rise time pulses. It features 5 ns rise time, an output capability of -12 volts peak across 50 ohms and 2 percent tilt in a 1 millisecond pulse. The Models 3368-G and 3388-G are the 40 and 60 dB versions in this family.



The Model 3362-G is a 20 dB gain version in a family of broad-band RC coupled amplifiers. It features a negative 6 volt peak output across 50 ohms with a rise time of 3 ns. The low frequency response of 1 kHz makes this unit useful for video amplification as well as fast rise pulse instrumentation. The Models 3364-G and 3366-G are the 40 and 60 dB versions in this family.

WIDEBAND TV DISTRIBUTION AMPLIFIERS
FOR PRODUCTION LINE OR LABORATORY DISTRIBUTION OF TV RF SIGNALS

Model	Passband 3 dB Nom. MHz	Outputs	Channels	Z In	Z Out	Typical Operation X-Mod	Description
1324	100 kHz-230 MHz	1	1-12	50, 75 select	50, 75 select	53-63 dBmV @ -57 dB	Rack Mount. 23 dB gain. Similar to Model 4375-S.

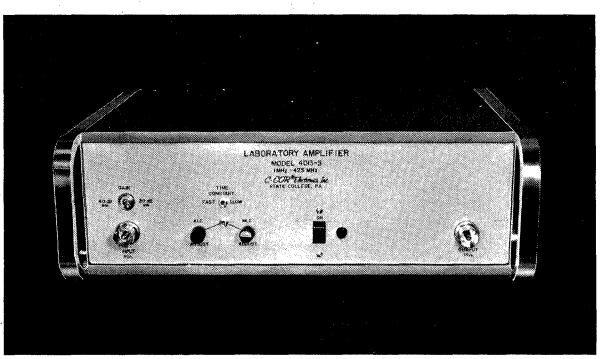
4375-P	2.5 ns RT, 10% ringing: 10% droop @ 200 ns			±7.5 VPulse @ 75 ±6 VPulse @ 50 @ spec. pulse	60, 40 or 20 select.	35	50:50 75:75	excellent fast pulse amplifier; typical RT: 2.1 ns

The Model 4375-S is designed for laboratory and systems use. It combines high output and wide bandwidth in an all solid-state unit. C-COR's unique solid-state distributed amplifier circuitry is used in the output stage to provide high output capability. A gain of 20, 40, and 60 dB is available in switched steps (by use of a step attenuator) with a vernier control of 0 to 6 dB for each step. The 4375-S is calibrated for flat response to serve as a general purpose sine wave amplifier or preamplifier. The 4375-P is calibrated for use as a fast rise time pulse amplifier.



The Model 4013-S is a general purpose laboratory instrument providing ½ watt of linear power from 1 MHz to 425 MHz.

The amplifier includes an internal electronic gain control circuit which provides convenient automatic levelling with CW and swept input signals. A manual gain vernier control and a step attenuator are also provided to increase the versatility of this instrument.

The Model 4013-P is an extremely versatile laboratory instrument with a 1.3 ns rise time and an output of ±6V into 50 ohms.

AUXILIARY EQUIPMENT

Model	Description	Specifications
3692-A	high impedance probe preamplifier	10 Hz-200 MHz @ 3 dB nom. passband, unity voltage gain. 3692-AB available aligned for pulse use 2 ns rise time.
3693-A	high impedance, probe amplifier	10 kHz-400 MHz @ 3 dB nom. passband, unity voltage gain. Model 3693-AB available for pulse use.
4622	battery powered preamplifier with rechargeable battery	10 Hz-60 MHz @ 3 dB nom. passband, 20 dB gain @ 75Ω. Use PS-22 charger for AC or battery operation.
A-760	matching transformer	50-75Ω, 100 kHz-220 MHz passband
WT-1	matching transformer	50-75Ω, 1 MHz-425 MHz passband
WT-2	matching transformer	25-50Ω, 100 kHz-400 MHz passband
PS-22	battery charger and power supply	for Model 4622 preamplifier
PS-22B	power supply for Min-Econ amplifiers	voltage range: 6 Vdc to 36 Vdc; current range: 30 mA to 90 mA
TGR	crystal controlled VHF signal source	solid state. Filtered output at specified frequency from 50 MHz-250 MHz

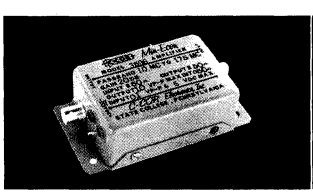
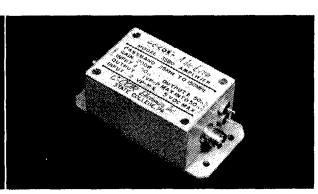
PS-22B Power Supply for up to Six Min-Econ Amplifiers



Min-Econ 1¼" x 2¼" x 3¼"



Mil Type Package

NOTES: Pricing, see Yellow Pages under C-COR.

1. Model No. Designation: 3000 series is amplifier module only; 1000 series 19" panel for rack mounting and power supply; 2000 series weatherproof enclosure with power supply; 4000 series lab instrument case and power supply.
2. Many Amps meet MIL SPECS. & we specialize in taylor-made designs; consult us with complex amplifier problems.
3. Technical Bulletin on I.M. distortion & other technical specs available on request.
4. Laboratory Instrument Case, includes power supply.
